Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: <ol style="list-style-type: none">1. Financial2. Healthcare3. IT	Financial
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the model_evaluation.ipynb file?	The investment tests performed indicate: that the proposed method is able to detect the changes in the financial markets and to extract the most profitable signals. Efficient Portfolio Selection and Optimization in Uncertain Environment A.M. M. El-Sherbiny Full Text Available The present paper is concerned with the efficient
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the model_fineturning.ipynb file?	The investment tests performed indicate: that the proposed model can be used to predict the performance of the system and to optimize the system parameters. The model has been developed and tested for a specific application. The model can be used to predict the performance of the system and to optimize the system parameters. The model has been developed and tested for a
